

TM-M

Ambient air monitoring, emission monitoring, workplace monitoring

Description:

use:	portable
measuring principle:	Scattered light, passive
approvals/standards:	Johannesburg convention, Respirable dust measuring
measuring range:	0 - 1 und 0 - 10 mg/m ³
lower detection limit:	approx. 5 µg/m ³ for DEHS-particles
output:	4 - 20 mA, digital interface
miscellaneous:	integrated data storage, LED display
application:	High resolution measurement of respirable dust at workplaces, in open country and at filter systems
article no.:	001.0075.000
